Dr.coffee GT2

GT2 series Suitable for small and medium-sized places, it uses a 10.1-inch high-definition color screen and a simple design to bring a new coffee experience. The whole milk path is detachable, the milk path is self-cleaning without interference, and the hidden milk tube design makes maintenance and cleaning easier. The ceramic grinder is perfectly combined with the high and low pressure brewing system to easily meet all the needs of high-quality coffee in business places.

Smart extraction

Dual compatible brewing system, intelligent pressure adjustment, high and low pressure extraction, meet the different taste demands of American coffee and Italian coffee.

Grind the powder evenly

Ceramic flat grinder, efficient heat dissipation design, uniform powder thickness, bringing out the taste characteristics of coffee products.

Convenient milk experience

The delicate and fragrant high-temperature milk froth system, with adjustable milk froth temperature, can complete automatic milk pipe cleaning.

Product efficiency upgrade

Producing more than 30 kinds of drinks, GT2 Pro can realize coffee and milk dispensing at the same time, still have stable and excellent performance under peak conditions.
